

Philadelphia as Classroom: An Inquiry Into Connected Learning Experiences

In this Inquiry to Action Group, we will discuss and develop ways to connect local learning institutions and professional communities to student learning in a way that steps beyond classroom walls to create in-depth learning experiences, connects students to authentic audiences and opportunities, and breaks down the invisible walls that mask young Philadelphia's potential as change agents within their communities. We will utilize the Connected Learning framework which pushes for more learning organizations to collaborate to include more interdisciplinary problem solving, critical thinking, and communication in youth learning experiences for 21st century success.

Read&Comment: A sampling of ideas for engagement. How can we leverage technology for classrooms to engage ample Philadelphia resources?
